

CUSTOM FLOCKED SWABS FOR ANY APPLICATION

Specimen Collection Swab Design, Development, and Manufacturing

With over 30 years of experience and 50 global patents on flocking technology, Microbrush is the ideal partner for custom test swab manufacturing. We've successfully developed and produced over 10 billion flocked applicators for partners both large and small. From our team of engineers and product designers to our fully equipped US-manufacturing facility, we're ready to support your custom sampling needs.

- ✓ **Variable and Flexible Design Options**

Fully customize the flock length, swab size, break point, shaft length and more to meet your technical specifications.

- ✓ **Customized to Your Sampling Needs**

We can support a variety of virus, bacterial, and surface sampling needs with a focus on exceptional specimen retention and elution.

- ✓ **USA Production and Supply Chain**

Sampling swabs are manufactured in the USA to strict quality standards. Our FDA-registered, ISO 13485 facility features automated equipment and 24/7 operations.

- ✓ **Full Service Manufacturing**

Custom design includes packaging with branded or private label options. EO sterilization available.
